

R&D TAX CREDITS FOR THE ENGINEERING INDUSTRY

DID YOU KNOW?

- Many design activities performed by engineering firms, especially those during the Schematic Design, Design Development, and Construction Documentation phases may qualify for sizable federal and state R&D tax credits.
- While contractual language is a relevant factor, qualifying activities under contracts with clients can also qualify in many cases.
- BRAYN’s expertise includes industry standard time tracking and job costing software, which provides for efficient cost analysis and excellent substantiation.
- Federal credits are dollar-for-dollar reducers of tax of up to 6.5% of qualified expenses and over 40 states offer similar R&D tax incentives that can double benefits in some cases.

“During the course of the credit study, we were impressed by BRAYN’s expertise in Deltek time tracking software, as well as in-depth understanding of our industry. We engaged with a strict deadline for the final calculations and BRAYN expedited the process to ensure we were able to meet that timeline. Throughout the process, they were easy to access and communicated often. The final documentation package BRAYN provided was thorough and clearly demonstrated that they understood our business.”
